

Appendix 12: List of OWP LCIs in AGRIBALYSE® 3.2

Inventory name in AGRIBALYSE® 3.2	Category	Processing from AGB 3.1.1
Average compost, from green waste, biowaste, sludge, manure, slurry (amendment), allocation cut-off on process {RER} U	Compost	modified
Biowaste, shredded {RER} U	Compost	retained because of methodological alignment
Compost, of biowaste and green waste 50-50 (amendment), allocation cut-off on process {RER} U	Compost	modified
Compost, of biowaste and green waste 90-10 (amendment), allocation cut-off on process {RER} U	Compost	modified
Compost, of green waste (amendment), allocation cut-off on process {RER} U	Compost	new
Compost, of green waste and straw 50-50 (amendment), allocation cut-off on process {RER} U	Compost	modified
Compost, of sludge and green waste 53-47 (amendment), allocation cut-off on process {RER} U	Compost	modified
Compost, of solid fraction of digestate from manure and green waste (amendment), allocation cut-off on process {RER} U	Compost	modified
Compost, of solid fraction of slurry (amendment), allocation cut-off on process {RER} U	Compost	modified
Compost, of swine slurry and straw 71-29 (amendment), allocation cut-off on process {RER} U	Compost	modified
Green waste and straw, shredded {RER} U	Compost	retained because of methodological alignment
Green waste, shredded {RER} U	Compost	new
Straw, shredded {RER} U	Compost	new
Agricultural digestate, stocked in silo (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Average agricultural digestate (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Average digestate, from manure and maize silage (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Average digestate, from manure and slurry (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Biogas, from anaerobic digestion of biowaste, allocation cut-off on process {RER} U	Digestate	modified
Biogas, from anaerobic digestion of cattle slurry, allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Biogas, from anaerobic digestion of maize silage, allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Biogas, from anaerobic digestion of manures mix, allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Biogas, from anaerobic digestion of swine slurry and maize silage (33%), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Biogas, from anaerobic digestion of swine slurry and maize silage (67%), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Biogas, from anaerobic digestion of swine slurry, allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Digestate, from anaerobic digestion of biowaste (fertilizer), allocation cut-off on process {RER} U	Digestate	modified
Digestate, from anaerobic digestion of cattle slurry (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Digestate, from anaerobic digestion of maize silage (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Digestate, from anaerobic digestion of manure and slurry mix (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Digestate, from anaerobic digestion of swine slurry (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Digestate, from anaerobic digestion of swine slurry and maize silage (33%) (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Digestate, from anaerobic digestion of swine slurry and maize silage (67%) (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
K fertiliser, from liquid fraction of digestate, from manure and crops, ammonia stripped (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Liquid fraction of digestate, from manure and crops, dewatered by centrifugation (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Maize silage, shredded, allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Mineral concentrate, from liquid fraction of digestate, from manure and crops, ammonia stripped (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Raw and solid fraction of digestate 70-80%DM, from manure and crops, thermally dried (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment

Solid fraction of digestate 20-30%DM, from manure and crops, dewatered by centrifugation (amendment), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Solid fraction of digestate 90%DM, from manure and crops, ammonia stripped, thermally dried (fertilizer), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Solid fraction of digestate 90%DM, from manure and crops, thermally dried and pelletised (amendment), allocation cut-off on process {RER} U	Digestate	retained because of methodological alignment
Biological sludge, 20%DM, from aerobic treatment of slurry (fertilizer), allocation cut-off on process {RER} U	Effluent	modified (water balanced)
Droppings, 85%DM, from poultry manure, thermally dried, allocation cut-off on process {RER} U	Effluent	new
Final effluent, from aerobic treatment of slurry (for irrigation), allocation cut-off on process {RER} U	Effluent	modified (water balanced)
K fertiliser, from liquid fraction of slurry, ammonia stripped (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Liquid fraction of raw slurry, dewatered by centrifugation (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Manure and solid fraction of slurry, thermally dried (amendment), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Manure, from cattle, for direct spreading (amendment), allocation cut-off on process {RER} U	Effluent	new
Manure, from cattle, stocked in concrete surface or pit (amendment), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Manure, from poultry, for direct spreading (fertilizer), allocation cut-off on process {RER} U	Effluent	new
Manure, from poultry, stocked in concrete surface or pit (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Manure, from swine, for direct spreading (amendment), allocation cut-off on process {RER} U	Effluent	new
Manure, from swine, stocked in heap (amendment), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Manure, mix, stocked in concrete surface or pit (amendment), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Mineral concentrate, from liquid fraction of slurry, ammonia stripped (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Slurry, from cattle, average, stocked in silo and concrete pit (fertilizer), allocation cut-off on process {RER} U	Effluent	new
Slurry, from cattle, for direct spreading (fertilizer), allocation cut-off on process {RER} U	Effluent	new
Slurry, from cattle, stocked in concrete pit (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Slurry, from cattle, stocked in silo (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Slurry, from swine, average, stocked in silo and concrete pit (fertilizer), allocation cut-off on process {RER} U	Effluent	new
Slurry, from swine, for direct spreading (fertilizer), allocation cut-off on process {RER} U	Effluent	new
Slurry, from swine, stocked in concrete pit (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Slurry, from swine, stocked in silo (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Slurry, mix, stocked in concrete pit (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Slurry, mix, stocked in silo (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Solid fraction of raw slurry 30-50%DM, dewatered by centrifugation (amendment), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Solid fraction of slurry 90%DM, ammonia stripped, thermally dried (fertilizer), allocation cut-off on process {RER} U	Effluent	retained because of methodological alignment
Cocoa shells, processed, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Coffee residue, processed, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Compost, for organic fertiliser, shredded, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Compost, of manure and agroindustrial residues (for organic fertiliser) (amendment), allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Olive pomace, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Olive pomace, processed, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organic amendment, <3% N, bulk, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organic amendment, <3% N, granulate, packaged, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment

Organic fertiliser, >3% N, bulk, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organic fertiliser, >3% N, granulate, packaged, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organic fertiliser, 3-2-3, bulk, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organic fertiliser, 3-2-3, granulate, packaged, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organic fertiliser, 7-6-8, bulk, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organic fertiliser, 7-6-8, granulate, packaged, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organic fertiliser, average, granulate, packaged, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organo-mineral fertiliser, 11-4-12, bulk, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organo-mineral fertiliser, 11-4-12, granulate, packaged, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organo-mineral fertiliser, 5-5-10, bulk, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organo-mineral fertiliser, 5-5-10, granulate, packaged, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organo-mineral fertiliser, 6-3-10, bulk, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Organo-mineral fertiliser, 6-3-10, granulate, packaged, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Processed residues from agrifood industries, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Rendered animal by-products (fertilizer), allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Wool residues, from scouring of greasy wool, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Wool residues, from skirting of greasy wool, allocation cut-off on process {RER} U	Commercial fertiliser(s)	retained because of methodological alignment
Excretion during grazing, as K ₂ O {FR} U	Other	retained because of methodological alignment
Excretion during grazing, as N {FR} U	Other	retained because of methodological alignment
Excretion during grazing, as P ₂ O ₅ {FR} U	Other	retained because of methodological alignment
Horn meal, at regional storehouse {FR} U	Other	retained because of methodological alignment
Biogas, from anaerobic digestion of sewage sludge, water balanced {RER} U	Sludge	modified (water balanced)
Sludge, 1-7%DM, from wastewater treatment, stocked in silo (processing level 1) {RER} U	Sludge	retained because of methodological alignment
Sludge, 22-33%DM, average of dewatering technologies, water balanced (processing level 4) {RER} U	Sludge	modified (water balanced)
Sludge, 22-80%DM, from wastewater treatment, stocked in concrete surface (processing level 6) {RER} U	Sludge	retained because of methodological alignment
Sludge, 22%DM, from wastewater treatment, dewatered by bed filter, water balanced (processing level 4) {RER} U	Sludge	modified (water balanced)
Sludge, 23%DM, from wastewater treatment, dewatered by centrifugation, water balanced (processing level 4) {RER} U	Sludge	modified (water balanced)
Sludge, 25%DM, from wastewater treatment, stabilised by liming, water balanced (processing level 3) {RER} U	Sludge	modified (water balanced)
Sludge, 3-5%DM, average of digestion technologies, water balanced (processing level 3) {RER} U	Sludge	modified (water balanced)
Sludge, 3%DM, from wastewater treatment, chemically conditioned, water balanced (processing level 3) {RER} U	Sludge	modified (water balanced)
Sludge, 3%DM, from wastewater treatment, stabilised by aerobic digestion, water balanced (processing level 3) {RER} U	Sludge	modified (water balanced)
Sludge, 3%DM, from wastewater treatment, stabilised by anaerobic digestion, water balanced (processing level 3) {RER} U	Sludge	modified (water balanced)
Sludge, 33%DM, from wastewater treatment, dewatered by press filter, water balanced (processing level 4) {RER} U	Sludge	modified (water balanced)
Sludge, 4-6%DM, average of thickening technologies, water balanced (processing level 2) {RER} U	Sludge	modified (water balanced)
Sludge, 4%DM, from wastewater treatment, thickened by flotation, water balanced (processing level 2) {RER} U	Sludge	modified (water balanced)
Sludge, 4%DM, from wastewater treatment, thickened by gravitation, water balanced (processing level 2) {RER} U	Sludge	modified (water balanced)
Sludge, 6%DM, from wastewater treatment, thickened by dewatering table, water balanced (processing level 2) {RER} U	Sludge	modified (water balanced)

Sludge, 80%DM, from wastewater treatment, solar dried, water balanced (processing level 5) {RER} U	Sludge	modified (water balanced)
Sludge, 90%DM, from wastewater treatment, thermally dried, water balanced (processing level 5) {RER} U	Sludge	modified (water balanced)
Sludge, average of dried sludge 80-90%DM, allocation cut-off on process {RER} U	Sludge	modified
Sludge, limed (amendment), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened (fertilizer), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened and dewatered (fertilizer), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened, anaerobically digested and centrifuged (amendment), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened, anaerobically digested, centrifuged and limed (amendment), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened, anaerobically digested, centrifuged and thermally dried (amendment), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened, and anaerobically digested (amendment), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened, centrifuged and solar dried (fertilizer), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened, centrifuged and thermally dried (fertilizer), allocation cut-off on process {RER} U	Sludge	modified
Sludge, thickened, dewatered and thermally dried (fertilizer), allocation cut-off on process {RER} U	Sludge	modified
Treatment of biowaste, anaerobic digestion, allocation cut-off on process {RER} U	Digestate/Treatment	new
Treatment of biowaste, co-composting biowaste-greenwaste 50-50, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of biowaste, co-composting biowaste-greenwaste 90-10, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of green waste, co-composting biowaste-greenwaste 50-50, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of green waste, co-composting biowaste-greenwaste 90-10, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of green waste, co-composting greenwaste-solid fraction of digestate from manure 10-90, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of green waste, co-composting greenwaste-solid fraction of slurry 3-97, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of green waste, co-composting greenwaste-straw 50-50, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of green waste, unmixed composting, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of greenwaste, co-composting sludge-greenwaste 53-47, allocation cut-off on process {RER} U	Compost/Treatment	new
Treatment of sludge, includ. conditioning, allocation cut-off on process {RER} U	Sludge/Treatment	new
Treatment of sludge, wo conditioning, allocation cut-off on process {RER} U	Sludge/Treatment	new
Average compost, from green waste, biowaste, sludge, manure, slurry (amendment), burden on downstream {RER} U	Compost	retained BUT not methodologically aligned
Compost, of biowaste (amendment), burden on downstream {RER} U	Compost	retained BUT not methodologically aligned
Compost, of biowaste and green waste (amendment), burden on downstream {RER} U	Compost	retained BUT not methodologically aligned
Compost, of green waste (amendment), burden on downstream {RER} U	Compost	retained BUT not methodologically aligned
Compost, of sludge and green waste (amendment), burden on downstream {RER} U	Compost	retained BUT not methodologically aligned
Compost, of solid fraction of digestate from manure and green waste (amendment), burden on downstream {RER} U	Compost	retained BUT not methodologically aligned
Compost, of solid fraction of slurry (amendment), burden on downstream {RER} U	Compost	retained BUT not methodologically aligned
Compost, of swine slurry and straw (amendment), burden on downstream {RER} U	Compost	retained BUT not methodologically aligned
Biogas, from anaerobic digestion of biowaste, burden on downstream {RER} U	Digestate	retained BUT not methodologically aligned
Digestate, from anaerobic digestion of biowaste (fertilizer), burden on downstream {RER} U	Digestate	retained BUT not methodologically aligned
Sludge, limed (amendment), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
Sludge, thickened (fertilizer), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
Sludge, thickened and dewatered (fertilizer), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned

Sludge, thickened, anaerobically digested and centrifuged (amendment), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
Sludge, thickened, anaerobically digested, centrifuged and limed (amendment), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
Sludge, thickened, anaerobically digested, centrifuged and thermally dried (amendment), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
Sludge, thickened, and anaerobically digested (amendment), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
Sludge, thickened, centrifuged and solar dried (fertilizer), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
Sludge, thickened, centrifuged and thermally dried (fertilizer), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
Sludge, thickened, dewatered and thermally dried (fertilizer), burden on downstream {RER} U	Sludge	retained BUT not methodologically aligned
